SUMMARY

Penetration tester running authorized web application, red team, and social engineering assessments for commercial and federal clients, including FedRAMP engagements. Owns engagements end to end, from scope through the client report. Completing a B.S. in Cybersecurity at Old Dominion University and pursuing the OSCP.

EXPERIENCE

RISCPoint | Remote

Penetration Tester

May 2025 to Present

- Run web application, red team, and social engineering engagements end to end using Burp Suite Pro, Kali Linux, Metasploit, Nmap, and GoPhish, from scoping through client report delivery.
- Led a FedRAMP assessment for a federal cloud service provider covering more than twenty externally facing web applications on IIS and ASP.NET, producing twelve findings with three rated high severity.
- Found a DOM-based cross-site scripting flaw in a help component shared across five to six applications, where the sanitizer stripped literal and hex-encoded colons but not the HTML entity form.
- Identified an authorization bypass in an application with ten user roles, plus a deprecated OAuth 2.0 implicit flow and GraphQL introspection left enabled in production.
- Built and ran a phishing campaign against roughly thirty employees using a lookalike domain, and mapped red team techniques to MITRE ATT&CK.
- Extracted a client chatbot's full system prompt through direct prompt injection, documented as high severity. Wrote findings to FedRAMP Penetration Test Guidance for Third Party Assessment Organization review.

Cyber Security Consultant

Nov 2024 to May 2026

Cyber Security Intern

Apr 2024 to May 2026

- Wrote technical documentation and ran QA for a SaaS product performing automated penetration testing, reviewing tool output for accuracy and logging discrepancies.

EDUCATION

Old Dominion University, Norfolk, VA

Bachelor of Science, Cybersecurity

Expected 2026

Relevant coursework in offensive security, network and wireless security, cryptography, cloud security, digital forensics, and cyber law and ethics.

CERTIFICATIONS

Offensive Security Certified Professional (OSCP), in progress

TECHNICAL SKILLS

Offensive Security Burp Suite Pro, Metasploit, Meterpreter, Nmap, GoPhish, Kali Linux, John the Ripper, Hashcat

Cloud and Infrastructure AWS security assessment, ScoutSuite, IAM and S3 configuration review, MITRE ATT&CK, FedRAMP reporting, Windows Server, Active Directory

PROJECTS

Cloud Security Assessment, AWS. Configuration review across IAM, S3, EBS, and load balancer settings using ScoutSuite, reducing a full scanner export to a short list of defensible findings.

Offensive Security Labs. HackTheBox modules and coursework labs covering UNION-based SQL injection, reflected cross-site scripting, and REST API method substitution.
